

As a current XM radio subscriber their service of providing Traffic and Weather 24/7 is very much appreciated. I do not tune to my local AM or FM stations at all nor do I intend too. I do like the Traffic and Weather but if it were not available I would not turn to a local broadcaster for it. I simply cannot tolerate all of the commercials and unnecessary chit chat that makes up 1/2 of all commercial radio stations. If anything the ability of the satellite radio companies to deliver this service will cause local broadcasters to provide better service themselves. I think this will ultimately benefit all radio listeners regardless of AM/FM or satellite.

Respectfully,

William J Williford
